

Personal Power UK Tahitian Noni Juice

The search for feeling better has led to the remote paradise of French Polynesia. It is in this pristine location, among simple people, that a most unusual plant was discovered. The plant in the native tongue is simply called Noni.

What is Tahitian Noni juice?

TAHITIAN NONI Juice is a pure, natural juice product. Noni has a rich tradition among the peoples of Polynesia. The health promoting benefits of Noni have been chronicled for generations among the peoples of the South Pacific, New Zealand, Australia, Malaysia, India and the islands of the Caribbean. The fruit of the Noni plant is treasured throughout Polynesia for its unique health benefits.

Tradition and science at last agree

Let's be honest. Even in our enlightened times, scientists and naturalists do not see eye to eye. So many products exist on the market that lack the scientific scrutiny necessary to get our complete confidence. Scientists have studied the Noni plant for decades hoping to unlock the secrets of its tremendous impact on the body. In study after study, researchers have discovered scientifically what the traditional Polynesian healers have always known - it works!

Studies show Noni's potential to support the immune system, regulate proper cell function and revitalise cells. It is truly rare to find a pure product so comprehensive in its benefits and so rich in scientific validation.

What sets Noni apart?

1. Tahitian Noni juice is the pure juice from the fruit of the Noni plant. A small amount of pure natural fruit juice is occasionally added for flavoring. *No preservatives are added.*
2. Noni juice works at the cellular level to increase the functions of cells and rejuvenate (or revitalise) cells.
3. Compounds within Tahitian Noni juice actually increase the ability of cells within the body to absorb and utilise nutrients such as vitamins and minerals.
4. Tahitian Noni juice has never been available commercially. It has never been commercially cultivated.

The history of Noni

Ancient peoples of French Polynesia colonised islands throughout the South Pacific. As they made their voyages from island to island in ocean-going canoes, they brought with them sacred health-promoting plants from their home islands. Noni is known as the queen of these plants. Ancient healing manuscripts, handed down from generation to generation, cite the Noni fruit as a standard in natural health preparations. The Noni plant flourishes in the lush and unspoiled islands of French Polynesia (the best known of these islands is Tahiti). It is from this tropical island paradise that Noni originates, harvested by native folk who have long benefited from its amazing qualities. The plant reaches heights of 15-20 feet and yields fruit year-around. The mature Noni fruit is about the size of a potato. Aside from the well-known qualities of this amazing plant, it has been used throughout the ages as a pure food in times of famine. Truly, this plant is unique among the wonders of nature. The island group known as Tahiti is considered to be the source of the finest and most potent Noni in the world. Noni grows larger and more lush in Tahiti than in other location. Research has determined that because of the ideal climate and soil conditions, as well as the fact that the islands are still in their pristine condition, Tahiti is the superior source of Noni.

How to get the best results from 100% pure Noni juice

Tahitian Noni juice is ready to use right from the bottle. Our recommendation for most people is to take one ounce (two tablespoons) per day. Adjust this amount up or down to satisfy your particular needs.

Noni is best taken in the morning or before meals. Traditional Polynesian cultures recommend taking Noni during peaceful or restful times during the day. (However, we happen to know of individuals who sip it throughout the day with amazing results!).

Answers to a few of the most frequently asked questions:

1. What is the shelf life of Noni?

Noni is packaged in a high quality recyclable glass container to achieve a shelf life of 18-24 months, perhaps longer, unopened. Please refrigerate after opening to maintain freshness.

2. May I mix Noni with other juice?

Yes. Some individuals prefer to mix their Noni with a pure juice or other beverage. This is perfectly okay. Noni has already been flavored with 100% pure and natural fruit juices to give it a unique but pleasing flavour right from the bottle.

3. When can I expect to get results?

Everyone is unique - some will notice a difference immediately, while others will take longer to experience the benefits. This has to do with the unique qualities of each individual. Everyone should commit to taking Noni for 90 days, and become aware of the subtle changes that will take place. Experience with Noni consumers indicates that approximately 25% will experience a noticeable difference in three weeks or less, 50% from 3 - 8 weeks and 25% from 8 - 12 weeks.

4. Why is Noni packaged in a glass container? Wouldn't it be less expensive to ship if it were in a plastic container?

- Glass packaging allows thermal treatment of the Noni juice in the bottling process, thus avoiding the use of any preservatives. The primary desire is to bring the juice of the Noni to market with the same purity as it is used in the islands. The thermal treating does not hurt the effectiveness of the product.
- Glass packaging prevents the gas-exchange problem experienced with a plastic container. The last drop of Noni will be as fresh and pure as the first. Glass packaging insures maximum shelf life. Remember, the glass container is completely recyclable.
